Wollongong, Australia

EXPERIENCE

• NVIDIA

Applied Scientist

Dec 2024 - Sep 2026

Hanoi, Vietnam

- **BioNeMo**: Enhanced Generative Models for Molecular Docking - [DiffDock](#).

1. Investigated dataset scaling and augmentation strategies, large-scale training pipelines, and architectural and algorithmic enhancements to improve the generalization and docking accuracy of DiffDock.
2. Contributed to the development and release of enhanced molecular docking models through [NVIDIA DiffDock NIM](#) and [NVDock](#), supporting scalable generative AI for structure-based drug discovery.

• Samsung SDS

AI Research Engineer

Feb 2023 - Nov 2024

Hanoi, Vietnam

- Researched and developed a Text-editing Diffusion model to modify some text areas with other contents, so that maintain the original style with the realistic appearance.
- Researched, developed and deployed a Visual information extraction model to accurately categorize entities and match them as key-value pairs in documents, which achieved a long-term contract with Singaporean customers and some business opportunities.
- Researched and deployed the precise Optical Character Recognition (OCR) system that covered many different types of documents.

• VinBrain JSC (Acquired by NVIDIA)

Applied Scientist

Feb 2022 - Dec 2022

Hanoi, Vietnam

- Contributed on Computer-Aided Diagnosis solution to determine liver cancer by analyzing Vietnamese abdomen multi-phases CT images:
 1. Researched and developed AI model to classify phase for the multi-phases dynamic CT images, achieving over 95% classification's accuracy on the real data.
 2. Researched and Developed AI model to segment hepatic region for the multi-phases dynamic CT images.
 3. Reviewed the model's results on the production to evaluate the real performance and take necessary measures.

• VinBigdata Institute

Technology Specialist

Sep 2021 - Jul 2022

Hanoi, Vietnam

- Completed courses in the AI Engineer Training Program, including Python, Linear Algebra, Probability and Statistics, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, AI Ethics.
- Led a team with 4 members to complete 3 projects:
 1. Ventilator Pressure Prediction
 2. Semi-supervised Semantic Segmentation
 3. Detect and suggest corrections in Vietnamese documents

• iBME Lab

Research Assistant

Jan 2017 - Jan 2023

Hanoi, Vietnam

- Developed a machine learning model to quantitatively evaluate the balance disorder patient through the central point of mass.
- Designed IoT system to monitor environmental factors in the library.
- Developed image processing solution to collect and extract data from balance disorder patients based on image processing algorithm.
- Authorship of 2 research papers published on journals.

EDUCATION

- **Hanoi University of Science and Technology**
Bachelor of Engineering in Electronics and Telecommunications
◦ CGPA: 3.62/4.00 (equivalent to 90.5%)

Sep 2016 - Aug 2021

Hanoi, Vietnam

PUBLICATIONS

- [C1] Huyen Nguyen*, **Tuan Le***, Kim-Loc Nguyen, Yuxing Peng, Emine Kucukbenli, Mai Thi Hien, Steven Truong, and Van Ha Tang. **Scaling Pocket Docking with Data Augmentation and Heterogeneous Equivariant Graph Attention**. *The Workshop on Generative and Agentic AI for Biology, International Conference on Machine Learning 2026*.
- [J1] Luong, Manh-Tu, Khanh Huyen Thi Pham, Nhat-Hai Nguyen, **Van-Tuan Le**, Phu Tran Vinh Pham, Tan Khanh Nguyen, and Thi-Thu Nguyen, "**FRAIL: fragment-based reinforcement learning for molecular design and benchmarking on fatty acid amide hydrolase 1 (FAAH-1)**", *Molecular Diversity* (2026) - Impact Factor 4.3.

SKILLS

- **Programming Languages:** Python, Matlab, C/C++
- **Software Development:** Git, Docker, Linux, Slurm
- **Deep Learning & Machine Learning:** PyTorch, NumPy, Pandas, Scikit-Learn, OpenCV
- **Deep Learning Applications:** Image Classification, Image Segmentation, Optical Character Recognition, Key Information Extraction, Relation Extraction, Generative Artificial Intelligence, Molecular Docking
- **Academic Research:** Conducting Literature Review, Writing Research Proposals, Publications

HONORS AND AWARDS

- **Certificate of Excellent Graduate Student** Aug 2021
Hanoi University of Science and Technology
- **Best Thesis Presentation Award** Aug 2021
Hanoi University of Science and Technology
- **Certificate of Teaching Assistantship** Feb 2021
Hanoi University of Science and Technology
- **Scholarship "Ho Tro Hoc Tap 20192"** Oct 2020
Hanoi University of Science and Technology
- **Top 6 in "Sang tao tre 2019 [Youth Innovation 2019]" – "Smart up for life"** Dec 2019
Hanoi University of Science and Technology & VNPT
- **Scientific Research Student Award** May 2019 & May 2021
Hanoi University of Science and Technology

LANGUAGES

- **English:** Fluent (IELTS 6.5)
- **Vietnamese:** Mother-tongue
